CNP Series

DESCRIPTION:

Cernex's CNP series are driver amplifiers for Clock Recovery and Forward Error Correction systems up to 40Gb/s. These driver amplifiers are designed and built with state of the art thin-film GaAs FETs technology that can be optimized to meet all customers' system requirements. Most applications for these driver amplifiers are used in telecom, terrestrial, and optical fiber communications systems. Cernex offers several options such as integrated phase compensation, variable gain control, and built-in detectors/power monitors.
