CMB Series

DESCRIPTION:

Cernex CMB series balanced mixers are offered in coaxial and several waveguide bands to cover the frequency spectrum from DC to 100 GHz. These mixers employ high performance GaAs Schottky beamlead diodes and balanced configuration to produce superior performance with moderate LO pumping level. The mixers are designed for full RF waveguide band operation with extremely wide IF bandwidth. These mixers offer moderate port to port isolation, which is high enough for most applications to eliminate additional filter requirement. These mixers are idea candidates for test equipment, communication systems and Radar receivers where frequency down conversion is desired.
